DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse claims 1-2, 4, 6-11, 13, 16-27, 30-35, 37-43 of an electrolyte comprising cyclic ethers and inorganic nitrites in the reply filed on 2-5-07 is acknowledged. The traversal is on the ground(s) that there would not be a burden to search all the species. This is not found persuasive because there are a huge number of species to search for and by picking an elected species it allows for a better search.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 3, 5, 12, 14-15, 28 and 36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2-5-07.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1745

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-2, 4, 6-11, 13, 16-27, 30-35, 37-43 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3, 9-35 of copending Application No. 10/753,031. Although the conflicting claims are not identical, they are not patentably distinct from each other because Application No. 10/753,031 claims a cell comprising a cathode comprising an electroactive sulfur-containing material; an anode comprising lithium and a nonaqueous electrolyte. The electrolyte comprises one or more nonaqueous solvents selected from acyclic ethers, cyclic ethers, polyethers and sulfones and one or more N-O additives.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
